To Our Friends and Neighbors – Supporters of Youth Activities:

Our softball leagues in Texas ASA District 39 are located throughout the Golden Triangle area. Our District is an integral part of the Texas Amateur Softball Association, which is affiliated with the Amateur Softball Association of America (ASA/USA). Our area includes all of Jefferson, Orange, and Hardin Counties as well as portions of Liberty and Jasper Counties. As all of you know, Hurricane Rita had a devastating effect on these and other counties. The youth softball leagues facilities, the area City complexes, and boys' baseball facilities throughout this region have significant damage. As ASA District officials, we have a very large responsibility to help with repairing their playing facilities before the Spring season. This responsibility encompasses giving guidance, fund-raising, making contacts for potential donations, and physical work involved in the actual repairs.

District 39 representatives have surveyed each facility; we have gathered the officials of the leagues to ascertain specific needs so that comprehensive plans can be made to raise funds, acquire materials, and replace needed equipment. We believe that the softball families within the leagues can and will provide the manpower in many areas of the repair work. Other areas will require professional skills from licensed personnel.

We are asking for your help and support. Our leagues are in need of fencing materials (both chain link and wooden), light poles, electrical wiring and light fixtures, bleacher materials, cinder blocks for dug-outs, materials for dug-out covers. Also, for concession stands, there is a need for sheet rock, plywood, lumber, significant amounts of various kinds of roofing materials, and concession equipment that has been ruined. The concession stand is a vital component in the operation of the leagues because funds realized help to pay the way for a season of games, as well as post-season play in Texas ASA Championships. The setting of electrical poles, hanging light fixtures and/or adjusting the fixtures for the correct lighting is also a very big need.

Of course, monetary donations will help. We will have an account set up shortly whereby you would be able to make a donation that would be tax deductible.

But, the materials, equipment and services listed above are just as significant in helping with our recovery process. If you are in a position to make a donation of any of the above materials and/or professional services, please do so.

If you and/or your Company are willing to help in assuring that the facilities for our youth are repaired and ready for their Spring season, please contact one of the persons on the attached sheet. Your contribution will be tax deductible and we pledge to acknowledge and advertise (unless you wish otherwise) each donation of any kind so that the public knows you are supporting the youth in our communities.

Sincerely Yours,

Linda L. George for
Texas ASA District 39 Softball Leagues

W. L. Lowrance, Deputy/Deputy UIC : Alton McCurley, Deputy/District UIC
